

Best Practice Guidance for Registered Nursing Agency & Bank Staff Working in Adult Critical Care

In response to the growing number of temporary nursing staff being used in critical care units across England, Wales and Northern Ireland to support workforce challenges and maintain safe staffing levels, the Critical Care Networks-National Nurse Leads (CC3N) forum have developed best practice guidance set out below to guide organisations when using temporary staff in critical care.

The guidance provides the infra-structure to support safe, equitable care and treatment to critically ill patients and their families. The aim is to safe guard the interests of patients and the wider public by focusing on the responsibility of individual registered nurses, critical care units and agencies / RN nurse banks, to ensure that temporary staff are competent and appropriately trained to work in the critical care environment. The guidance supports the national patient safety agenda and link closely to the recommendations outlined in recent high profile public enquiries ^{1,2}. The best practice guidance aims to guide the delivery of a quality critical care experience that is reflective of the patients' expectations, clinical condition and level of care ³.

Professional nursing bodies recognise that caring for patients within the critical care environment is complex and highly technical. This requires a unique level of specialist knowledge and skill that can only be adequately provided by registered nurses with the relevant level of competence.

To ensure that the temporary nursing staff deployed within critical care units are safe, competent and value for money, it is recommended that Human Resource (HR) departments in critical care provider organisations should include the following in Service Level Agreements (SLAs) with agencies and temporary staff suppliers:

- 1. CC3N Best Practice Guidance for Registered Nurses Working Temporarily in Adult Critical Care.
- 2. Completion (by the agency/bank) and submission to the critical care service of the 'worker checklist' for critical care nursing staff prior to proposing a candidate
- 3. An agreed process for raising concerns that ensures all parties are involved and notified when any issues arise and that all appropriate action is taken and recorded

³ Department of Health (2015) NHS Constitution for England

It is the responsibility of those supplying registered nurses through agency/bank to:

1. Provide a robust and structured recruitment process that includes;

- Individuals are able to demonstrate an active NMC registration (Level 1)
- Current compliance with all mandatory training requirements
- Demonstration of current critical care experience a minimum of 450 hours over last three years within a comparable unit
- Evidence of maintaining critical care competence
- References must be sought from a previous and/or current critical care line manager
- There is also a responsibility to inform the critical care unit with the details of any active and/or current disciplinary or performance investigations and/or sanctions

2. Provide a robust and structured annual review processes that includes;

- Annual individual performance review and personal development planning
- Annual feedback from critical care units on behaviours, performance and team working
- NMC Revalidation preparation, support and confirmation ⁴

3. Provide the critical care unit (at the point of confirming the agency booking) with a summary or checklist outlining the minimum criteria listed below:

- Demonstration of active NMC registration
- Current compliance with all mandatory training requirements
- Demonstration of critical care experience, as a minimum of 450 hours over a three year period within a comparable unit
- Evidence of maintaining critical care competence⁵
- Feedback on any outstanding concerns and/or issues previously raised

⁵ CC3N (2015) **National Competency Framework for Adult Critical Care Nurses**. Available at: http://www.cc3n.org.uk/competency-framework/4577977310

It is the responsibility of critical care units utilising registered nurses through agency/bank to:

- Not utilise greater than 20% of registered nurses from bank/agency on any one shift when they are NOT their own staff ^{6,7}
- Provide all agency/bank staff with unit orientation (for examples please refer to appendix 2/3)
- Act on any feedback provided by the agency in relation to the safety, quality and experience
 of the working environment and culture

Where appropriate instigate a review and, if necessary, carry out an investigation into the concerns raised and formulate an action plan as appropriate within the allocated timeframe

It is the responsibility of the individual registered nurse being supplied by agency or bank to adult critical care units to:

- Only accept shifts within critical care if they are confident and competent they are able to work without direct supervision⁸.
- Be able to provide documentary evidence that they are competent to work in a critical care environment (via the employing agency)
- Provide feedback to their employing agency regarding any issues or concerns they may have with professional conduct, safety, quality and experience of the service they are deployed to work in and escalate accordingly
- Be accountable for the shift pattern and hours of work they have agreed to and been rostered for to ensure adequate rest to deliver safe patient care compliance with working time directive ⁹.

Appendix 1

Agency/bank staff unit orientation should include:

- Local working environment (e.g. equipment, IV administration)
- Geographical information (e.g. facilities for breaks, unit layout)
- Emergency procedures (e.g. fire, resuscitation)
- Infection Prevention & Control (e.g. standards for hand hygiene and PPE)
- Computer access
- Point of care testing
- Laboratory test ordering and results access
- Escalation processes and summoning a doctor

Appendix 2

Example induction checklist for Registered Agency and Bank Staff Nurses working in Adult Critical Care Units.

Acknowledgement to University Hospitals Bristol NHS Foundation Trust for providing original template.

Dear Agency Nurse

Welcome to our Intensive Care Unit, we hope you enjoy your shift here. We understand that it is difficult coming to work on a new unit and aim to provide good knowledge and support to assist you. We also welcome any feedback from you in order to learn and develop the unit for future agency staff. In order for us to optimise and maintain patient and staff safety, we do expect you to follow our clinical guidelines and policies which can be found under the 'Resources Link' on the bedside PC (Critical Care Staff Area page) – please ask to be shown their location. Trust policies and Protocols can also be accessed from the bedside PC. If you are unsure of a process / policy or guideline that affects your work, please speak to the nurse in charge for guidance. A member of staff will conduct the Agency Staff Orientation, there is a checklist that must be signed and returned. Please ask if this does not happen in the first hour of your shift.

Below are some key safety points that we would like to highlight.

- ALL Ventilated / Tracheostomy patients **MUST** have at least 3 staff to reposition.
- If your patient has a High Risk Airway please read the guideline [Resource Folder]
- All CD/ IV/Stat medications **MUST** be checked by 2 registered staff.
- **Zopiclone** is stored in the locked cupboard below the CD cupboard and is otherwise treated as a CD (signed in register / 2 RN checks at bedside)
- **Tramadol** is stored in the locked cupboard but **not** signed out of CD register. IV and PO Tramadol to be checked and signed by **2 RN's**
- Patients own Tramadol / CD's are stored in CD cupboard and signed out of Patients own CD
 Register
- If a procedure is unfamiliar please ask for guidance prior to commencing task.
- **DO NOT** leave your patient without informing another registered nurse.
- Nursing Assistants are **NOT** to be left alone with patients unless directed to do so by the Nurse in Charge.
- Emergency Pager **MUST** be worn at all times if you are in Beds 7/8/9.
- ID Passes [when issued] **MUST** be returned at end of shift

If you require help and cannot get it easily please call the Nurse in Charge, who will assist. If you have a possible emergency situation, Please pull the Nurse Emergency Bell – Blue Triangle pull on the monitor pendant to gain immediate response.

AGENCY NURSE ORIENTATION CHECKLIST - INTENSIVE CARE UNIT

This orientation checklist is designed to ensure that Agency and Bank staff have an understanding of procedures and expectations whilst working on ITU. This ensures that you are provided with the required information to assist you whilst working in this new environment whilst maintaining staff and patient safety. Please ensure all points below are covered and initialled by both staff.

Name	Agency	Date
Action		Initial
Read Agency letter, Highlight Safety points.		
Layout of ward, inc: Bed Numbers, Visitor Reception, Sluice, Treatment Room, Staff		
Emergency Procedures: Crash Trolleys, Mac Blade, Emergency Call. Vent Alarm		
Emergency Pagers for beds 7 / 8/ 9		
Fire Exit Locations and procedure. Fire alarm Testing		
Telephone System, Including Bleeps and nurse in charge telephone		
Visiting Hours, Facilities, Reception phone		
Resource Folder Online Location		
Explain different staff uniforms and roles. Registered Nurses, Health Care Assistants, Doctors, Physiotherapists, Pharmacists, Dietician, Speech and Language Therapists, Administrators.		
Doctors ward round – and how to contact them		
Medicines Management: Patient only medications at bedside, IVs not be drawn up more than 1hr in advance, Controlled Drugs MUST be used or destroyed immediately.		
Guide to Clinical Information System, Issue Username [record on letter and below]		
Explain Patient Monitoring system, how to change limits etc. Ventilators and Medical Devices		

Any Concerns should be discussed with the Nurse in Charge as soon as identified
